

Pravila citiranja literature (Vancouver stil) prema:

Citing Medicine: The NLM Style Guide for Authors, Editors, and Publishers [Internet]. 2nd edition. (<https://www.ncbi.nlm.nih.gov/books/NBK7256/>)

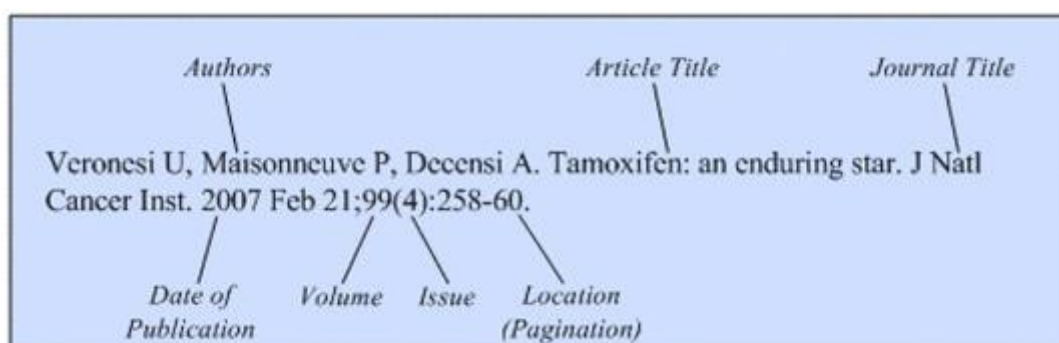

Citiranje literature je postupak opisa korištenih publikacija ili dokumenata u tekstu uz pomoć bibliografskih elemenata i obično se navodi na kraju teksta. Struktura literaturnih navoda za svaku pojedinu vrstu publikacije ili dokumenta sadrži osnovne elemente bibliografskog opisa koji će biti navedeni posebno za svaki oblik publikacije.

Podatak o citiranoj jedinici se u radu pojavljuje obvezno dva puta, prvi put u tekstu rada, a drugi put u popisu korištene literature. Referencije se označavaju arapskim brojkama od broja 1 na dalje u tekstu, a u popisu korištene literature se upisuju redosljedom pojavljivanja u tekstu rada i označavaju se samo rednim brojem, a ne u zagradi (primjer – 13. Sidlova JS, Benes P, Holoubkova Z. Visual field.....). U samom tekstu referencije se navode u obloj zagradi na kraju rečenice u kojoj se referencija koristi te se nakon zagrade stavlja točka (primjer – (3).).
